Thessaloniki, Greece (EU Passport / AFM & Yellow Card holder)

QA Product Engineer with a background in manual testing and IT project management. I focus on making product requirements clearer, testing more effectively, and helping teams release with confidence. I've worked across SaaS, ERP, CRM, and e-commerce environments, and I'm comfortable being the person who connects business logic with technical execution.

EXPERIENCE

Zebracloud AB, Lithuania (remote) — *QA Product Engineer*

January 2024 - April 2026

- **SaaS Product Ownership & SDLC:** Partnered directly with Developers and Product Owners to refine system logic and business requirements, reducing requirement ambiguity before sprint planning.
- **Strategic & Manual Testing:** Executed end-to-end Manual, Functional, and Regression test suites across Windows, macOS, and mobile devices (iOS/iPadOS) using BrowserStack.
- **Defect Management & STLC:** Structured the full Defect Lifecycle in Jira, creating high-detail bug reports and test scenarios that streamlined developer resolution time.
- **AI-Driven Development & Prototyping:** Leveraged Lovable (No-code AI) to rapidly design and deploy responsive landing pages, UI banners, and client forms, cutting prototyping time from days to hours.

SIDE PROJECTS & AI IMPLEMENTATION

- **Live Web Deployments:** Independently built, tested, and launched 3 live web products (devcraft.gr, lotusbloom.gr, cleanupaskg.gr) using Lovable AI and modern UI/UX principles.
- **End-to-End Quality Assurance:** Performed complete manual QA cycles across multiple devices and viewports, ensuring flawless mobile responsiveness and zero critical launch bugs.
- **Production Lifecycle & Deployment:** Managed the entire pipeline

from AI prototyping to version control and deployment using **GitHub** and **Vercel** (including environment configuration & DNS setup).

Sonaro UAB, Lithuania (remote) — Manual QA Engineer

March 2021 - February 2023

- **Multi-Platform & E2E Testing:** Performed **End-to-End (E2E) testing** and **User Acceptance Testing (UAT)** for diverse E-commerce platforms and complex ERP systems, ensuring seamless performance across mobile and desktop environments.

- **Bug Tracking & Agile Collaboration:** Identified, documented, and tracked bugs in **Jira and Confluence**, collaborating with the development team through the **Defect Lifecycle** and providing actionable product improvement suggestions.

- **Technical Documentation:** Authored comprehensive user manuals, **Test Cases**, and onboarding documentation in English and Lithuanian to facilitate smoother client onboarding and product adoption

UAB Capital Realty, Lithuania — IT Project Manager

November 2017 - November 2018

- **Dual Responsibility:** Managed CRM maintenance and sprint planning while simultaneously conducting QA testing for the core web system and corporate pages.

- **Team Leadership:** Led Ruby and PHP development teams through sprint cycles, delegating tasks and monitoring delivery timelines.

- **B2B Relations:** Managed regular communications with international clients in the UK, Spain, and Latvia, ensuring project alignment with business needs.

SJ DIGITAL LLC, Lithuania — IT Project Manager

May 2016 - November 2017

- **Agile Management:** Orchestrated daily standups and sprint planning for .NET and PHP teams, focusing on the delivery of newly created IT projects.

- **International Stakeholders:** Served as the primary point of contact for B2B clients in the USA and New Zealand.

- **Hands-on QA:** Conducted manual QA for all new project releases to ensure they met client specifications before deployment.

TECHNICAL SKILLS

- **Testing Methodologies:** Manual Testing, Functional & Non-functional testing, Regression testing, Cross-browser & Cross-platform testing, Defect Lifecycle, Test Case Design, Smoke Testing.

- **SDLC Frameworks:** Agile, Scrum, Kanban, Sprint Planning
- **Systems & Platforms:** SaaS, ERP systems, CRM, E-commerce, Windows, macOS, iOS.
- **Tools & Software:** Jira, Confluence, Trello, BrowserStack.
- **AI, No-code & Hosting:** Lovable AI, GitHub, Vercel (Basic deployment & env configuration), Responsive web design
